- (54) Title: PIPERIDINE QUINOLYL PROPYL DERIVATIVES, PREPARATION METHOD AND COMPOSITIONS CONTAINING SAME
- (54) Titre: DERIVES DE LA QUINOLYL PROPYL PIPERIDINE, LEUR PREPARATION ET LES COMPOSITIONS QUI LES CONTIENNENT

(57) Abstract: The invention concerns piperidine quinolyl propyl derivatives of general formula (I) wherein: R1 is H or halogen, or OH, R'1 is H, or may represent halogen when R1 is also halogen, and R° is H, or R1 and R° together form a bond and R'1 is H, R2 is a carboxy, carboxymethyl or carboxy-2-ethyl radical, and R3 is C1-C6 alkyl substituted with 1 to 3 substituents selected among OH, halogen, =O, COOH, alkyloxycarbonyl, alkyloxy, alkylthio or among a phenyl, phenylthio or phenylalkylthio radical which can themselves bear 1 to 4 substituents [selected among halogen, OH, alkyl, alkyloxy, trifluoromethyl, trifluoromethoxy, COOH, alkyloxycarbonyl, CN, acetamido or NH2] or among cycloalkyl, cycloalkylthio (3 to 7 members), or among aromatic heterocyclyl or heterocyclylthio (5 to 6 members) comprising 1 to 4 heteroatoms selected among N, O or S and optionally substituted themselves [with halogen, OH, alkyl, alkyloxy, CF<sub>3</sub>, OCF<sub>3</sub>, =O, COOH, alkyloxycarbonyl, CN or NH<sub>2</sub>], R<sub>3</sub> is propargyl substituted with phenyl which can itself bear 1 to 3 substituents (selected among halogen, OH, alkyl, alkyloxy, CF3, OCF3, COOH, alkyloxycarbonyl, CN or NH<sub>2</sub>], or substituted with a cycloalkyl radical comprising 3 to 7 members or substituted with aromatic heterocycle (5 to 6 members) comprising 1 to 4 heteroatoms selected among N, O or S and optionally substituted itself (with halogen, OH, alkyl, alkyloxy, CF<sub>3</sub>, OCF3. =O, COOH, alkyloxycarbonyl, CN or NH2], or R3 represents cinnamyl or 4-phenylbuten-3-yl, or R2 is -CH2OH, alkyloxycarbonyl, alkyloxycarbonylmethyl or alkyloxycarbonyl-2-ethyl and R3 is C1-C6 alkyl substituted with phenylthio which can itself bear 1 to 3 substituents [selected among halogen, OH, alkyl, alkyloxy, CF<sub>3</sub>, OOH, alkyloxycarbonyl, CN or NH<sub>2</sub>], with cycloakylthio comprising 3 to 7 members, or with aromatic heterocyclylthio (5 to 6 members) comprising 1 to 4 heteroatoms selected among N, S or O and optionally substituted itself [with halogen, OH, alkyl, alkyloxy, CF3, OCF3, =O, COOH, alkyloxycarbonyl, CN or NH2] or R3 is propargyl substituted with phenyll, ?which can itself hear 1 to 3 substituents [selected among halogen OH, alkyl, alkyloxy, CF3, OCF3, COOH, alkoxycarbonyl, CN or NH2], or substituted with cycloalkyl comprising 3 to 7 members or substituted with an aromatic heterocyclyl with 5 to 6 members comprising 1 to 4 heteroatoms selected among N, O or S and optionally substituted itself (with halogen, OH, alkyl, alkyloxy, CF<sub>3</sub>, OCF<sub>3</sub>, =O, COOH, alkyloxycarbonyl, CN or NH<sub>2</sub>), and R<sub>4</sub> is C<sub>3</sub>-C<sub>6</sub> alkyl, (C3-C1) alkenyl-CH2- or alkynyl-CH2
